

PROTECTA®

Protecta Tack Mat

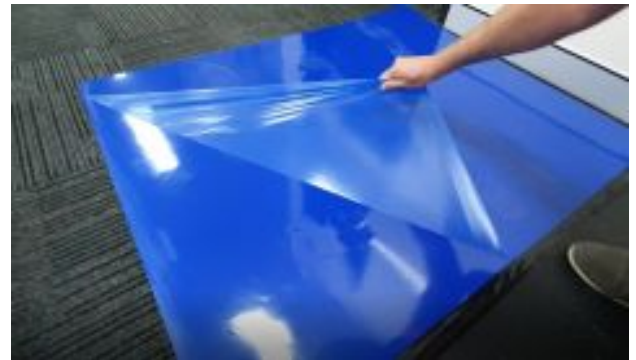

Setup & Usage Guide

Kit Includes

- 1 x Protecta Tack Mat- 30 Sheets

Instructions

1. Pull the yellow tab to remove the backing and expose the tacky base for securing to the surface.
2. Position the product in the desired location.
3. Peel off the top protective film to reveal sticky layer #30.
4. Once the layer becomes dirty or full, remove it by pulling the next numbered tab to expose a fresh layer.

Recommended Step

Use a reusable Tack Mat Base (PMB63 or PMB94) to provide a semi-fixed, stable platform for the tack mat sheets. This ensures a rigid foundation and improves overall system performance.
