

PROTECTA®

Protecta Sound Noise Barrier

✓ Noise reduction up to 60 dBA

✓ Easy to Handle

✓ Self-draining design

Protecta Sound Noise Barriers provide a quick-to-deploy acoustic solution for construction, demolition, civil and infrastructure projects.

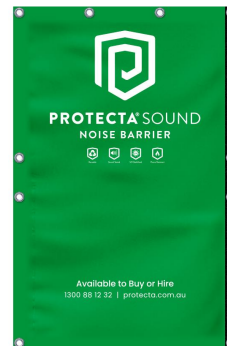

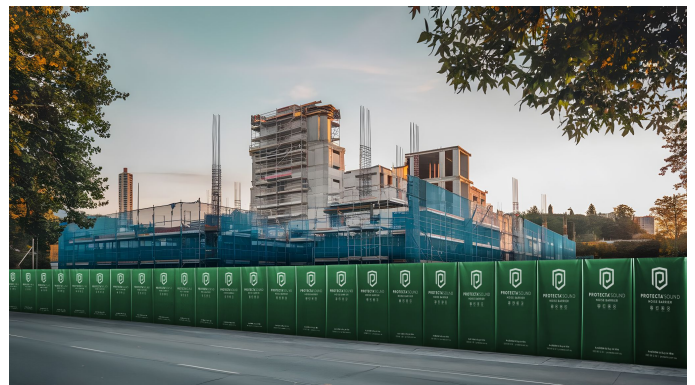

Key Benefits:

- Noise reduction up to 60 dBA (RW 26)*
- Absorbs up to 90% of noise
- Hook and loop joins provide a tight vertical seal
- Multiple eyelets for ease of installation
- Self-draining, resists mould and rot
- Made from up to 80% recycled material
- Flame Resistant (Group 1-S FR rated)
- UV Stabilised
- Easy to handle and install - 6.3kgs
- Available to buy or hire
- Allows for noisy works to be undertaken in many cases during normal hours, reducing out of hours costs

* See website for technical information and test reports

Main Applications:

Protecta Sound Noise Barrier can be attached with cable ties to temporary fencing or scaffolding, fixed directly to the work zone side of a wall or hoarding, or installed using ZipHooks (ZZH1) on ZipWall® poles.

ZipHook used to hang Protecta Sound Curtain
