Easy Roll-Out Protection Against Damage From Spills and Debris

A simple laminated cover sheet used for floor protection in indoor applications

Key Benefits:

- Fast to roll out
- Protect floors against liquid spills and dust
- Cost-effective, tough protection
- Residue free installation when used with hook tape

Main Applications:

- Carpet or other internal floor protection
- Cover sheet or dropsheet
- Use with ZipWall for a dust barrier or containment enclosure

Key Recommendations:

Placing short lengths of Hook Tape (HT5025-BK) every couple of metres around the perimeter of the Polyweave, secures the Polyweave firmly. This is a sturdy and trip-safe way of protecting carpets.

*Minimum quantity applies

Temporary surface protection is designed to protect surfaces from superficial damage. Users should ensure that the substrate can take the weight of any equipment or materials being used regardless of protection being in place.
